Sonja K

Age: 8 years
Species: Finn horse
Sex: Mare
Weight: 440 kg
Father: Pysteri
Mother: Vauhti-Likka

The riding school of Riihihaan teaches people how to ride with this saddle horse.

Sonja K. has rubbed itself and suffered from eczema during the last 3 years.

Every summer, the eczema is so bad that we have to cover it with a blanket during the whole summertime. Also during winter time the horse rubs its tail and mane. Vermicide had to be given regularly; a mineral had also to be left out during wintertime: but still the horse suffered and rubbed itself.

At beginning of November 2006 we started to give Penergetic-t horses product at a dosage of 4 g per day.

After one month; Sonja K stopped to rub itself completely. Now the tail and the mane are growing back at full speed. The coat is shiny again. We will continue with dosage as before.
